

# What To Wear?

## Families & Groups:

- Results are often better if everyone is dressed in a similar style.
- Do not mix casual with formal.
- Solid colours work better than stripes & patterns.
- When families are photographed we generally photograph the children separately as well.

## Ladies:

- In family portraits it is more flattering to wear sleeves, than bare upper arms.
- Individual portraits wear something as glamorous as you like... borrow an outfit from a good friend!
- Darker clothing can look dramatic & tends to minimize body size.
- Lighter tones tend to emphasise body size.
- Make-up...the same as you would wear for a night out with the girls, especially the eyes. If in doubt less is better.

## Men:

- Dress for the occasion. Casual long trousers generally look better than shorts, even at the beach.
- Shirts/Tees.. Plain colours always best. Avoid logos.
- Make an effort, nothing wrong in trying to look good.

## Children:

- Avoid anything that is too distracting like logo tops & large motifs.
- If in doubt bring a change of clothes.

## Pregnancy Portraits:

- 35-37 weeks is generally a good time for this unique occasion.
- Anything feminine, soft flowing plain chiffon, sarongs make a good substitute.

## Babies & Newborns:

- In photographs babies look better wearing as little as possible.
- Try to avoid heavy knitted items.
- Photographing your baby when asleep looks pretty cute, so try not wake them when you arrive at the studio.

## Teenagers:

- Normally at this age it's so uncool being photographed with Mum & Dad.
- Let them wear what they like plus what you would like them to wear.

## Finally:

- Whatever the occasion good professional portraits mark a time in your life never to be repeated.
- Make an appointment now, 'phone Phone Jan on 9306 4048 for availability & prices.
